

Problem Definition

Proposed Project:	Smart Study Session Planner
Date Produced:	05/16/2025
Background	<p>As university students ourselves, we find it hard to always stick to a planned study session since scheduling conflicts may arise unexpectedly due to other commitments that we may have forgotten about. Much like us, many students seem to have issues with planning and sticking to schedules, so we decided to do something about it. The Smart Study Session Planner (SSSP), will automatically create balanced weekly study calendars that make laying out a student's schedule a whole lot easier.</p> <p>The primary goal is to convert a student's deadlines, availability and study preferences into an editable planner that boosts productivity.</p>
Key Features	<ul style="list-style-type: none">• Timer• Calendar• Statistics Dashboard• In-app notification
Primary Goal	<p>Convert a student's deadlines, time availability, and study preferences into an optimized, editable weekly plan that maximizes preparedness while minimizing stress.</p>
Stakeholders	<p><i>Primary:</i> Students (end users). <i>Secondary:</i> Academic advisors, wellness centers (interested in stress metrics)</p>
